Full-Stack Developer with 3+ years of experience building scalable, responsive web applications, with close attention to UI detail. Experienced in integrating major third-party platforms, including Shopify, Wix, and social media APIs (Meta, TikTok, Pinterest, X, Snapchat,..). AI-first engineer who uses Claude Code and Codex daily, designing agent workflows with MCP, skills, and subagents to ship faster and deliver higher-quality code.

SKILLS

- AI-Assisted Development:** Claude Code, Codex, Prompt Engineering
- AI Agents & Workflows:** Agent Harness, Skills, Agent Workflow, AI Agents, Subagents
- AI Integration:** MCP, RAG, Memory Management
- Tech Stack:** TypeScript, React, NestJS, Golang, MySQL, Mongo, Redis, Docker

WORK EXPERIENCE

- FullStack

Jul 2024 - Present

Hanoi

XIPAT FLEXIBLE SOLUTIONS COMPANY LIMITED

 - Built a high-load tracking pixel system that captures and processes large volumes of e-commerce events in real time.
 - Developed a product sync service that pushes catalogs from e-commerce platforms (Shopify, Wix) to social channels (Meta, TikTok, Pinterest, X, Snapchat).
 - Developed Shopify apps end-to-end with React, Polaris, Liquid, NestJS, and Golang, and independently owned several products from idea to release.
 - Drove AI adoption in the team, using Claude Code and Codex with custom skills, subagents, and MCP to speed up development and code review.
 - Contributed product ideas and shipped new features within a Scrum team.
- Frontend

Aug 2022 - Jul 2024

Hanoi

OCEAN TECH CO., LTD

 - Developed dynamic web applications with reusable UI components, optimized for performance and cross-browser consistency.
 - Led the Front-End team on a project, managing tasks and ensuring timely, high-quality delivery.
 - Collaborated with design and development teams in an Agile Scrum environment to turn UX/UI designs into user-friendly websites.

PROJECTS

- TikShop: Feed & Omega Pixel

Jul 2024 - Sep 2026

Overview: A Shopify app for accurate TikTok Ads tracking that combines multiple TikTok Pixels with the server-side Events API to recover conversions lost to iOS 14.5, plus automated hourly catalog sync to power dynamic product ads.

Role: Full-Stack Developer

Responsibilities:

 - Built a high-load tracking system combining client-side pixels and server-side TikTok Events API.
 - Built the product sync pipeline from Shopify to TikTok Catalog / TikTok Shop, supporting hourly automated and custom sync.
 - Developed key features including the TikTok Campaign Builder, automatic pixel installation, and the free plan.
 - Built and improved the merchant-facing UI with React and Polaris, helping the app meet Built for Shopify standards.
 - Applied AI-first development (Claude Code, Codex) to speed up feature delivery and code review.
- Omega InstaFeed – Instagram Feed

Jan 2025 - Dec 2025

Overview: A Shopify app that turns Instagram posts, reels, and UGC into shoppable storefront widgets, with hourly auto-sync, product tagging, and engagement analytics.

Role: Full-Stack Developer

Responsibilities:

 - Integrated Instagram/Meta APIs to import posts, reels, and UGC with hourly auto-sync.
 - Built responsive storefront widgets (Grid, Carousel, Highlight, Collage) with shoppable product tags.
 - Developed engagement analytics (CTR, add-to-cart, conversion rate) and AI color presets.
